

As the snow mounds are melting and the sun is shining we are gearing up for a busy season. Enhancing London's landscape... one garden at a time has been our way of life for 20 years .

Steve Check, co-owner of Nature's Image, has spent the last 30 years landscaping in London and earning the respect of the industry and the community. His love of landscaping shows in everything he does. Every garden he creates is unique to its owner. He also does many unique hardscaping projects consisting of natural stone, man made stone or a combination, and all can be done with budget in mind.

Whether you're considering a whole new landscape, a garden renovation, or you just need your gardens cleaned up, contact us through our website and Steve will respond promptly.

It's great to see the sun shining after a miserable snowy winter. Snow amounts have been below average over the past few years, so this winter found us a little out of practice. Even the City of London struggled to keep up. Weather forecasters occasionally predicted much more snow than actual amounts, which was as frustrating as the massive unexpected 5 a.m. snowfall that caused so many delays. We are so glad it's over. Are you as ready for spring as we are?

Nature's Image strives to offer the best lawn and garden maintenance services in our industry. 2018 Runner Up in the LFP Best of London for Landscaping & Lawn care Services, #2 of 300 is pretty awesome.

Connor and Mitch will continue to set that high standard and to take great pride in maintaining our clients' properties using all-natural methods. It is an employer's great pleasure to tell employees about the positive feedback they receive from our many happy customers. See our updated website for information on recent changes to our services and pricing. Use the "Contact Us" page on our website if you would like an estimate for any of our services. If you have any questions, call Kayla in the office Monday to Friday between 9:00 AM and 5:00 PM

### ALWAYS WELCOMED

Visit our CSA this spring to see our organically grown and sustainably farmed market garden. Watch out for our honey bees, chickens and sheep, all very important to our farm.

### All-Natural Raw Honey

### Gardening Tips

Turn leaf debris left over from winter into mulch by running over it with your lawn mower. Instead of disposing of it, let it improve the quality of your soil.
